Sponsors Acknowledgements

UIA and the Organizing Committee would like to express their gratitude to all those who have generously contributed to UIA 2017 Seoul World Architects Congress.
Exhibition Overview

EXHIBITION OVERVIEW
UIA 2017 Seoul Exhibition is open to any organization, which may seek an opportunity to promote one’s experience, programs, products and services through operating commercial and/or non-commercial booths at the Congress. This event will be the best platform to initiate and expand your market share with promotional booths of cutting-edge technologies and products of Architecture.

Open to the general public, as well as delegates, an Architecture Fair in the COEX, promises to offer the latest product developments, technological innovations, and service offerings in the world of architecture and design.

Student & Young Architects Platform is to be a festivity for everyone: students, professionals, young architects, and the public, in celebrating and embracing architecture. Engaging the sub-theme, Architecture Conflux, students and young architects will come together to collaborate on designing 5 pavilions, which will be displayed throughout the congress for different venues.

Company & Product Introduction
Polycarbonate awnings: D.I.Y. awnings with simple and good design which can be easily installed. Pillar covers with wood pattern, made of alluminium, make a construction look natural, can be installed very easily without any tools.

Company & Product Introduction
While cement has become the most commonly used material in modern construction, it has also become a construction necessity because of its ease-of-use and strong durability. As natural marble is the most natural construction material for humanity, natural marble bricks have combined the characteristics of both marble and the advantages of existing bricks to create an entirely new construction material by grafting together marble and cement for use in modern construction.

The company expressed hopes that natural marble bricks will launch a new revolution in construction history and will continue pursue continued development in the field of construction.

No heat bridge means energy saving, direct installation on to the panel means saving construction time and money. For the efficiency and easy construction, DONGGUN Panel is being used by Korean government buildings, major entrepreneurs, and private clients; also widely used for green remodeling of old office & commercial buildings, houses, apartments, etc. DONGGUN Panel is used for German Passive Houses and certified as the best new insulation panel by Korean Architects Association. In 2016, DONGGUN has awarded the best insulation construction company by the Minister of Korean Ministry of Land, Infrastructure, and Transport.

Company & Product Introduction
DONGGUN INC (with its 30 years of construction experiences) specializes in the construction of energy efficient wall system. Recently, we have invented insulation panel named DONGGUN PANEL (Polyisocyanurate Insulation Panel with incorporated inner structural frames/ Zero Heat bridge effect) in which structural frame is incorporated.

For the sake of the inner frame, you can install the panel on any walls using screw bolts without heat bridge; then you can put siding materials such as metal, ceramic, stones, etc. directly on to the panel through the inner frame without installing additional sub-structure for the siding.
당사는 글로벌 부품 소재 전문기업으로서 금번에 출품할 제품은 고층건물에서 사고 발생시 안전하게 탈출 할 수 있는 피난 대피장치입니다.

Company & Product Introduction
This is a company that specializes in research and development, manufacturing and construction of eco-friendly building materials, and thinks about environment and human future.

Introduction of item
1. Thermal break fastener (construction new technology No. 793) - It is a dry installation method of exterior materials of exterior insulation building using exterior material fixing device which has a function to reduce thermal bridge phenomenon.
   - Type : single anchor type, twin anchor type, turn-cap type
2. External electric venetian blinds with adjustable top and bottom separation - This is the world's first domestic pure technology that can adjust the angle of the upper and lower slots by using a single motor as a variable type electric blind installed outside the window.
   - Type : General type, Separation type, High functional type

ENSAM is the first European school of architecture to be awarded UIA-UNESCO accreditation which highlights the following aspects of the school:
- ENSAM’s initial architecture teaching programme is strong, well established and the organisation of a homogeneous teaching body is mostly made up of practitioners, which is essential for the quality of education.
- The development strategy of international partnerships in education and research in the field of tropical and Mediterranean architecture.
- The scientists’ publishing programme is inclined to support diversification within the master programme.
- The strong network of working relationships between schools and professional organisations facilitates the employability of its students. These strengths were cited in the experts’ reports giving accreditation UIA-UNESCO to ENSAM without restriction for 5 years (2014-2019).
**Company & Product Introduction**

'나우(NOW)' means 'better, more leisurely, a little more' in Korean.
All the time is made up of a bunch of 'NOW'.
The perpetuality of time makes us always stay in this moment, and it is the medium that keeps youth and youthful condition.
The power of the word 'NOW' helps us to remember that we are a progressive youth.
To build a better world, we, NOW architects, are building 'NOW, these moments'.

MOMOWO - WOMEN’S CREATIVITY SINCE THE MODERN MOVEMENT I CO-
FOUNDED BY THE CREATIVE EUROPE PROGRAMME OF THE EUROPEAN
UNION

Company & Product Introduction

Women’s creativity since the Modern Movement is a large-scale cooperation project co-funded by the European Union “Creative Europe Programme” and it is coordinated by the Politecnico di Torino (Italy). MoMoWo approaches women’s achievements in the fields of design and architecture understanding this topic as a key contemporary issue from a cultural, social and economic perspective. The project includes women’s contributions to architecture, civil engineering, urban planning, landscape design, interior design, furniture and furnishing design, areas that are still perceived as male-oriented professions.

Through its Exhibition MoMoWo aims to: - stimulate interest in the lives and work of women in the design professions, - raise awareness of the obstacles and challenges that women designers have had to contend with and are still facing today - promote gender equality in rights and professional opportunities.

The MoMoWo Exhibition highlights the contribution of female designers, neglected so far to European cultural heritage and – considering History as a ‘living matter’– intends to promote the value of the works designed by past and present women professionals to encourage future generations of creative women.

Besides the coordinator, six other institutions cooperate in MoMoWo: Universidade Europeia IADE (Portugal), Universidad de Oviedo (Spain), Vrije Universiteit Amsterdam (The Netherlands), Research Centre of the Slovenian Academy of Sciences and Arts (Slovenia), Université Grenoble Alpes (France) and Istituto Superiore sui Sistemi Territoriali per l’Innovazione (Italy).
POSCO A&C have lots of green remodeling track records including business building in HFUS global campus Design+Build project, Public office building energy performance consulting project(2015,2017),Dormitory building in HFUS global campus, Electrical Energy building in Daejeon EXPO park, The K insurance Headquarter building etc. Awarded grand prize at 2016 green remodeling contest, the project provide healthy environment to building user(students and professors) by improving building energy performance and design not only considering value enhancement of the building but also considering owner’s budget, the project got interest subsidy from LH green remodeling center and.

Company & Product Introduction

**Company & Product Introduction**

Architectural Society of China is a national academic institute constituted by the professionals of architectural science and technology in China. It is the member institute of China Association of Science and Technology and closely related by profession to the Ministry of Housing and Urban-Rural Development.

ASC was founded in October 1953. Mr. Liang Sicheng, Mr. Yang Tingbao and other famous Chinese architects assumed the leadership in the following years. ASC convenes the most outstanding experts, scholars and engineering technicians of the architectural field in China, and becomes the reliable think-tank and assistant of the government in promoting the urban and rural development.

Company & Product Introduction

The Chamber of Architects of Turkey (CAT) founded in 1954, is a Constitutional professional organization entrusted with the formulation of rules and regulations pertaining to architectural practice while seeking public interest and benefit of the society. CAT, with its accumulated experience of 63 years, while protecting the rights of architects, also works towards achieving a healthy living environment. Starting as a ground – breaking professional organization in the 1950s with a unique structure, the social character and professional background shaped its leading role in the struggles for better urban policies and implementations in the public interest in the country.

CAT works on various missions; from architectural education to continuous professional development (CPD), recognition of professional qualifications to international accreditation and improvement of professional environment in collaboration with national and international institutions.

The National Council of Architects, Planners, Landscapers and Conservationists, or CNAPPC, formed by the Ministry of Justice Law n. 1395/23, assumed its current name with D.P.R. 328/01 effectiveness, making official other specialized professionals in addition to architect. The Council is composed of 15 members, elected by the provincial Orders, and remains in office for five years. The current Council has been in office since 31 March 2016. Italian professional orders are divided into 105 provincial Orders, which function as second degree judiciaries and promote the culture of project planning and design. Regional bodies, boards and federations are voluntary bodies that bring together provincial Orders in the same geographical area to participate in initiatives linked to the tutelage and promotion of the professions of architect, planner, landscaper and conservationist.
At international level, the architectural profession is represented by international bodies coordinating the activities of the professional Orders and organize conferences and events to promote the quality of project planning and design.

Company & Product Introduction
NATIONAL COUNCIL OF THE ORDER OF ARCHITECTS OF CÔTE D’IVOIRE
The Order of Architects of Côte d’Ivoire was created by Law No. 70-488 of 3 August 1970.
The Order of Architects of Côte d’Ivoire is dedicated to the development of the profession of architect and to that of a new vision for the urban landscape, and this – as reflected by the projects initiated over the past few years – both on a national and Pan-African level.
The National Council of the Order of Architects is the organ of management and administration of the Order. It is composed of 13 statutory members.

Today, the number of architects registered to the Order is 153:
• 96 licensed to sign and file applications for building permits,
• 56 civil servants and employees and
• 1 member of the Economic and Monetary Union of West Africa (WAEMU).

Company & Product Introduction
The history of the UIA Work Programme “Spiritual Places” is relatively fruitful. It was started in 1995 as “Places of Worship”. Then it worked under the name of “Spiritual Places”. The program has 24 members from all UIA regions among others from: Poland, France, USA, Russia, Sweden, Ukraine, Belorussia, Lithuania, Brazil, Israel, Malta, Italy, Hungary, Slovakia, Bulgaria, Serbia, Montenegro, Macau.

The programme proved that UIA perceived Poland as a very special place for this kind of architecture. In the 70s and 80s there were more than 3.5 thousand temples built in Poland. There was no other country in the world in which so many sacral buildings were built in 20 years. There was no place in the world in which such a global experiment in the architecture was carried out.

The Programme activity was devoted to analyze ideological, architectonic, theological, philosophical, economic and technical aspects of conversions and reconversions of sacred architecture which are noticed in different religious traditions. The research problems discussed at conferences, seminars, workshops, open lectures, exhibitions and working sessions.

Transmission of the results of the Programme activity was done through publications, monographs, competitive projects, experimental students’ projects and educational activities for schools of architecture, showing "good practices".

Company & Product Introduction
On 3rd September 1956, 27 architects gathered and formed “The Hong Kong Society of Architects”. In 1972, the Society officially changed name to “The Hong Kong Institute of Architects” which aims to continue to raise both the standard of architecture in Hong Kong and the standard of professional services offered by its members. Today, The Hong Kong Institute of Architects has about 4,500 members including 182 Fellows, 3,498 Members and over 650 Associates, Graduate Members and Student Members. In addition to the responsibilities of architects as professionals under law, members of the Institute are governed by a Code of Professional Conduct. This Code aims to provide the standard of professional conduct and self-discipline required of the members of the Institute in the interest of the general public.

Company & Product Introduction
The Japan Institute of Architects (JIA) is Japan’s only professional organization of architects. Its principal role is to define and promote the social and legal status of professional architects in Japan. Following seventy years of efforts on the part of our predecessors to establish the profession of architecture in Japan.
As an association of free and independent architects, the JIA is striving to create a greater understanding of the field of architecture within Japanese society, and to establish a firm social foundation and recognition for its members and their foreign counterparts worldwide.

Company & Product Introduction

Pertubuhan Akitek Malaysia (PAM) - Malaysian Institute of Architects - is the national professional institute representing architects in Malaysia. PAM was founded in 1920 as the Institute of Architects Malaya. In 1948, the name and consequently the Constitution were changed to the Federation of Malaya Society of Architects (FMSA) which was allied to the Royal Institute of British Architects (RIBA). Another change in name to reflect national sovereignty, and registration under the current name, came about when PAM was registered with the Registrar of Societies on 20 January 1967.

The Institute is managed by an elected Council consisting of a President, Deputy President, Vice President, Honorary Secretary, Honorary Treasurer and 13 Council Members. Also in Council are the Immediate Past President, up to 4 nominated Past Presidents, up to 3 nominated non-Corporate member and 4 elected representatives from the Chapters.

---

**Company & Product Introduction**

The Chamber of Architects of Turkey (CAT) founded in 1954, is a Constitutional professional organization entrusted with the formulation of rules and regulations pertaining to architectural practice while seeking public interest and benefit of the society. CAT, with its accumulated experience of 63 years, while protecting the rights of architects, also works towards achieving a healthy living environment. Starting as a ground – breaking professional organization in the 1950s with a unique structure, the social character and professional background shaped its leading role in the struggles for better urban policies and implementations in the public interest in the country.
CAT works on various missions; from architectural education to continuous professional development (CPD), recognition of professional qualifications to international accreditation and improvement of professional environment in collaboration with national and international institutions. Organizing the UIA 2005 World Architecture Congress gave the experience of a half century a new international dimension and has proved our institutional qualification in the world community of architects.
