Introduction of Tour

The Seoul Station Overpass was designed as the first that crosses from the east to the west of Seoul Station and completed in 2017 in order to cope with the increasing population and traffic congestion, being a symbolic structure of Seoul since then. With the gradient of the overpass existing around Seoul Station, it had become the face of Seoul for people who went to Seoul from the provinces. It is also felt as a part of memories of Seoul citizens who had passed through this overpass for the last 40 years.
Introduction of Tour

Seonyudo Park is one of Seoul’s most famous parks. Connected to the mainland by a beautiful arched bridge, the island was once an area of industry.

The Hangang River History Museum exhibits geological features, ecosystem and cultural heritage of this surrounding region. An aquaculture biotope garden provides much information on the growth and purification process of aquatic creatures. It is a rare garden that is very popular among visitors for its unique structure and is surrounded by flowers and plants.

Tour Itinerary

- **Date**: 3rd Sep or 10th Sep
